ARES® Training Plan Task Book

Task Book

The Task Book is a working document that enables those ARES® communicators electing to participate in the ARRL training plan to track and document their training plan elements as they are completed towards the various levels of increasing proficiency. The Task Book should contain all training plan items, completion dates and sign-offs as the ARES® communicator transitions through the three skill levels. The ARES® communicator is responsible for maintaining their Task Book and having it with them during training and assignments. The Task Book also contains sections with definitions of the communicator levels, as well as common responsibilities. This is considered the minimum requirements any additional training required at the local level is in addition to this Task Book.

Since the Task Book is personal to each ARES Communicator, each user should feel free to adapt it to their needs and requirements of their geographical region. An addendum page is included in each level of training for the room to add any additional task either required or completed.

Recommendations for minimum proficiencies and skills per level are listed. **ECs, at their discretion, can add or substitute skills that they consider important.** Prior known experience may be substituted for some listed tasks. It is suggested that items in the proficiency/skills section be used in training sessions or for meetings/events presentations.
